Public School Examinations

EXAMINATION RESULTS

Recommended from Grade I to Grade II on year's work:

Barbara Hay	95.
Isabel Pringle	93.8
Margaret Blackley	93.4
Betty Gideon	90.9
Melba Edgington	87.7
Hand Walker	87.5
Billy Rankin	85.7
Jean Moore	85.6
Dorothy Taylor	85.6
Margaret Geinger	85.2
Howard Hill	84.2
Norman Campbell	83.6
Donald Wilson	81.5
Billy O'Connor	81.3
Gertrude Teare	79.8

Promoted from Grade I to Grade II, June tests:

Gwen Williams	96.
Allen Clark	94.5
Jack Calkins	89.4
Arthur Balnes	89.
Dorothy Freitag	88.2
Roy Puffer	87.4
Dan Murphy	86.6
Betty Craiglen	86.5
George Thomas	79.9
Laura Oyster	5.4

Promoted to Grade II on trial:

Ivan Jones	52.4
------------	------

Ruby Lockerty, Teacher

Recommended Grade II to Grade III:

Edwin Brecht	91.97
Verna Vaughan	89.85
Edith Calkins	89.71
Viola MacKenzie	89.28
Margorie Rusk	88.28
Myrtle Brewer	87.71
Robert Laughlin	87.42
Patricia Jackson	87.1
Donald Jackson	86.14

Class Average 88.28

Promoted Grade II to Grade III, Written Examinations:

Robert Giddy	85.
Lola Saunders	84.82
Hubbard	83.14
JAMES MOORE	76.28
Lila Milford	76.
Margaret Graydon	75.86
Edith Steers	75.53
Robert Thompson	74.42
Catherine Babin	73.21
Margaret Ferrel	63.85

(Conditioned in Reading)

Norman Thomas 61.71 |

(Conditioned in Writing)

Failed:

Arnold Smith	56.85
Kenneth Brooks	47.85
Billy Lamb	47.42

Class Average 70.30

Recommended Grade III to IV:

Betty Mitchell	85.87
Lila Clark	84.87
Marguerite Walker	85.82
Shirley Webster	80.
Dick Brewer	79.82
Donald Neville	79.
Stewart Murphy	78.82

Class Average 84.3

Promoted Grade III to Grade IV, Written Examination:

Calvin Hoppus	73.
Arthur Geinger	71.02
Billy Hall	70.97
Beatrice Balnes	62.
Allen Campbell	67.5
Elmer Mast	64.87
Robert Chapman	61.

(Conditioned in Arithmetic)

Betty Lamb 45.76 |

(Failed)

Class Average 65.45

Teacher: Mabel M. Dowling

LECTION DEBAY WILL NOT AVAIL

The reorganization of the Alberta cabinet following the retirement of Mr. Brownlee is attracting attention outside the province. The Regina Leader-Post believes that it is desirable to consult the people when the authority and prestige of a government may be challenged by a considerable section of the public.

The Saskatchewan Star-Phoenix learns that the U.F.A. caucus decided against early dissolution because of two scandals affecting members of the cabinet in twelve months and their effect on the party position at the polls. Moreover, it discerns a weakness in the lack of definition of the relationship between the U.F.A. and the C.O.F.F. It adds that if the government has lost the confidence of the people, the mere fact of postponing the election day is not likely to help the administration.

The Anderson Government, it says, hoped against hope and went the full length of its term. "Conditions had shown signs of improvement on election day but that did not save the Government. Mr. Reid might be better advised to face the electorate frankly, say he has had a house cleaning and go to the people with a new Cabinet."

ABOUT FLIES

A recent letter from Dr. G. M. Little gives the following information about flies:

Disease Carriers—Flies are hatched in filth, and carry disease germs on their feet and bodies, as well as in the material which they eat. Fly specks have been found to contain living germs of several diseases. The fly may come to exposed food direct from feeding on the spum of a tuberculous individual, or the body wastes of a typhoid carrier.

Breeding Places: Each female fly lays about 125 eggs at a time, and each of these develops into a fly in about ten days, so the descendants of a single fly is tremendous during a summer season. They prefer to lay these eggs in stable manure, garbage, or even decaying grass will do.

Prevention: The most obvious and simple method of prevention is the removal of manure, garbage, etc., at least weekly, so that eggs laid in this material have no opportunity to hatch.

How to kill flies: Prevention is most effective, but killing them is valuable. Poison bait made in the proportion of sodium arsenite, one pound; molasses, two gallons, and water ten gallons, sprayed on areas where they collect, or used to wet decaying material, will bring near stable destruction many of them.

Traps, baited with sugar and water, milk or bananas are cheap and effective.

Screens on doors and windows are essential, and fly-paper and swatters are the line of defence.

Baby's carriage should have a fly netting cover, and his food and playthings also carefully protected.

Rimby News

RIMBY SPORTS DAY

Fair weather, good roads and prospects of a bumper crop brought out big crowds to the sports day events on Monday, 19th July, were taken in at the afternoon games, and the returns from the picture show and dance in the evening netted approximately \$115.00. Refreshment booths and crown and anchor boards did a flourishing business. The baseball game with Bentley resulted in a win for Rimby.

A summary of wins follows:

Girls' Footrace:
8 years and under, 1st, E. Riley; 2nd, E. Odenbach; 3rd, C. Kidding.
12 years and under, 1st, J. Riley; 2nd, M. Spinks; 3rd, B. Farnham.
18 years and under, 1st, E. Riley; 2nd, J. Riley; 3rd, E. Zutter.
Boys' Foot Race:
8 years and under, 1st, F. Thorvaldson; 2nd, R. C. Kirk; 3rd, J. Jones.
12 years and under, 1st, T. Melles; 2nd, G. McElroy; 3rd, E. Jones.
18 years and under, 1st, K. Clift; 2nd, A. Odenbach; 3rd, T. Melles.
Needle Race, Girls:
1st, E. Riley; 2nd, 1. Odenbach.
Needle Race, Boys: 1st, C. Perkins; 2nd, K. Clift.
Married Ladies' Foot Race: 1st, Mrs. H. Taylor; 2nd, Mrs. W. Pickett.
Cigarette Race, Ladies: 1st, Mrs. H. Taylor; 2nd, J. Riley.
Cigarette Race, Men: 1st, W. Pickett; 2nd, K. Clift.
Three-Legged Race: 1st, Elsie Grinde-J. Riley; Mrs. H. Taylor-M. Bryanton.
Backward Race: 1st, J. Kenny; 2nd, K. Clift.
Foot Mile Relay Race: 1st, J. Berry, K. Clift, W. Pickett; 2nd, C. Perkins; 2nd, W. Odenbach, C. Eckhardt; 3rd, W. Peabody, A. Odenbach.
100 yards dash: 1st, J. Berry; 2nd, K. Clift.
15 mile dash: 1st, C. Perkins; 2nd, W. Odenbach.
3-8 mile pony race: 1st, E. Edgington; 2nd, J. McLevin; 3rd, T. O'Leach.
3-8 mile open race: 1st, J. McLevin; 2nd, B. Adams; 3rd, R. Edgington.
1-2 mile open race: 1st, B. Adams; 2nd, H. Taylor.
Potato Race (horseback): 1st, E. Conant; 2nd, F. Derrman; 3rd, G. Wright.
1-2 mile relay: 1st, F. Derrman; 2nd, B. Adams.
Bucking Horse (9 entries): 1st, W. Thompson; 2nd, S. W. Reynolds; 3rd, A. Stewart.
Best Bucking Horse: 1st, "Fanny" owned by Fred Stewart; 2nd, "Bessy" owned by Frank Cooper; 3rd, "Monkey Wrench," F. Cooper.
The new Grand Stand provided shelter and comfort for spectators of the events and added its share to the day's receipts.
Caterers placed down town did a big business and the sports day was a huge success.
The five month old daughter of Mr. and Mrs. Wm. Broderson, of Ledaale passed away this morning in the Rimby Hospital, following pneumonia.
Albert Wright was operated on at St. Paul's Hospital at midnight for appendicitis. Dr. J. N. C. Byers performed the operation.
Leslie Rimbey mistook formaldehyde for lard and washed his mouth with it. He swallowed some of the liquid and was rushed to Dr. J. N. C. Byers for treatment. His condition is not serious.
Elmer, the ten year old daughter of Mr. and Mrs. Chapman had the misfortune to have the bone of her nose fractured when a swing in which she was playing collapsed Sunday evening. The child was unconscious for five hours, but at present is reported as progressing favorably.

LEADALE NEWS

The Leadale sports program on July 8th drew the largest crowd ever reported in the district. Races for children and adults and a series of softball games occupied the afternoon. Over a hundred couples attended the dance in the evening.

The outstanding event of the day was the performance of an Indian runner, "Adair-of-His-Shadow". He let Martin Parker, Leadale's running prize, get a big start and then passed him like a flash on a 100 yard dash. This occurred twice in succession and when congratulations poured in on him, the Indian merely shrugged his shoulders and said he had not been able to do very well since he broke his leg. He claims to have won a championship at the Calgary Stampede, last year.

When cream prices are low there is just that much more reason why your Separator should be a clean skimming DeLaval, Morrison & Johnston, Ltd.

SPRUEVILLE NEWS

The afternoon meeting of the U.P.W.A. will be held at the home of Mrs. English on Wednesday, July 19th. Roll call to be answered with suggestions for a picnic lunch.

Sprueville Junior Red Cross which has 12 members, received 100 per cent banner from Canadian Red Cross Society for good health and citizenship. Officers are Pres. Bob Crawford; Sec.-Treas. Beattie Biglands. During the year they raised \$13.15, also a box of clothing and toys which were sent to Red Cross.

A very enjoyable evening was spent by the community last Friday, when a shower was held in honor of Mrs. Harry Munce, (nee Miss Vera Burton). The bride and groom were the recipients of many lovely and useful presents. Dancing brought the evening to a close, and the young couple left with best wishes from all present.

Mr. and Mrs. Buchan and family spent the week end with Mr. and Mrs. R. Roken and Mr. Reid.

Mr. and Mrs. Hosh and family left for Calgary and Banff last Sunday for a week's holiday.

At the Avalon

"Lady For A Day" is distinctly in a class by itself as regards motion picture entertainment and possessing a story so universally appealing that it is impossible to predict anything but outstanding success for it, "Lady For A Day," the Columbia super-production starring Warren William with May Robson, starts tonight at the Avalon.

"Lady For A Day" is like a fantastic fairy tale, yet it is real and human. Its appealing humor and touching dramatic scenes make the laughs and tears blend wholesomely with an emotionally gripping effect that in at once overwarming and heart-warming.

A revelation to picture audiences will be the magnificent performance of May Robson as "Apple Annie." The complete cast, from the star down to the highest praise for matchless, inspired performance.

Frank Capra, the director again reveals his genius in comedy and drama. He has taken the brilliant story by Damon Runyon, which appeared in Cosmopolitan as "Madame La Grippe," and has transcribed it to the screen as an even more brilliant screen drama. Robert Riskin's adaptation is excellent.

This picture was awarded four stars in "Liberty."

Coming: "Take A Chance," July 19, 20, 21.

"Thundering Herd," and "Jimmy the Gent," July 26, 27 and 28.

The annual Camp Meeting of the Free Methodist church will be held at Alia, July 12 to 22. Meals free. Everybody welcome.

REID FORMS CABINET

With the inclusion of three new cabinet ministers, namely, J. J. MacLellan, Taber; J. R. Loe, Wainwright, and Hugh W. Allen, Grande Prairie, Alberta's third government under the United Farmer regime was sworn on by Hon. W. L. Walsh, lieutenant-governor, at 5:10 p.m. Tuesday, at the legislative buildings.

Premier R. G. Reid's new ministry brought about through the resignation of Premier Brownlee and his cabinet last week, now is "in the saddle," all formalities having been complied with. New members are preparing to take over their respective departments.

After the swearing-in ceremony in the lieutenant-governor's office, Premier Reid announced that the cabinet would be as follows:

Hon. R. G. Reid, premier and provincial secretary.
Hon. F. S. Grisdale, minister of agriculture.
Hon. J. F. Lymburn, attorney general.
Hon. Perren Baker, minister of education.
Hon. George Hoadley, minister of public health and telephones.
Hon. J. J. MacLellan, minister of public works.
Hon. Russell Love, provincial treasurer.
Hon. Hugh W. Allen, minister of lands and mines and municipal affairs.
Hon. Irene Parly, minister without portfolio.

GIRLS AND BOYS SWINE CLUB

Mr. Elliott of the Department of Agriculture addressed a meeting of the Boys and Girls Swine Club at Rimby on Monday, the club was organized in June with a membership of thirty. Mr. Gordon Wright, buyer for the Blindman Valley Livestock Association is leader of the club.

BLINDMAN M.D. NEW RIMBY QUARTERS

This M.D. of Blindman No. 430 moved into new official headquarters on Monday. Some weeks ago the council decided to dispose of the former office building and lot and to purchase property more suitable for both office equipment and the housing of municipal implements. The municipal office is now located in the new building at the corner of the bank of Montreal. The building has been completely remodelled, and placed upon a concrete foundation with a full basement fitted with storage space for documents. The interior has been partitioned to allow for council and larger meetings and secretary's private office, and the exterior has been freshly painted with the municipal name and number adorning the front. The grounds have been leveled and the rear of the lot will accommodate the municipality's machinery when not in use.

TOWN MILL RATE 49 FOR 1934

Lacombe's mill rate for this year shows increase of 9 mills over rate of 31 which obtained in 1932 and 1933. Due largely to reduction in assessment value of nearly \$80,000 and an operating deficit of \$4,000 covering the past two years which had to be budgeted out, the Council at its last meeting fixed at 38 for general and school taxation and 2 mills for the Government supplementary revenue tax. The increase in the amount of taxes to be paid by the ratepayer over last year's levy however will not be as great as the situation would indicate. Values have been decreased by about ten per cent.

AT BLACKFALDS Wednesday, July 18

All roads will lead to Blackfalds next Wednesday, July 18, when their 4th annual Sports Day will be held. There will be a full day of enjoyment for everyone, from 10:30 in the morning until dark. A big baseball tournament will take place, with teams entered from Lacombe, Clive, Blackfalds, and "Lakeland-Judith." All these teams are playing good ball, and competition should be very keen. A Junior Baseball game will take place between Blackfalds and Blindman and a close game is anticipated. Lacombe Girls will battle Blackfalds Girls in a Softball match. Do not miss this feature, as these two teams are good. A real program of sports for the kiddies has also been arranged, with races and jumping contests. There will be something doing all the time for old and young, so jump in the car or buggy, or wagon or on the horse and attend this event. Programme begins at 10:30 a.m. Admission to grounds 25c. A big dance will be held in the evening with Bone's orchestra.

PUBLIC MEETING JULY 20

An open meeting will be held in the Town Hall, Lacombe on Friday evening at 8:30, July 20, 1934 for the purpose of organizing a Ladies' Conservative Association for the Lacombe Constituency.

This meeting will be addressed by Mrs. Fitzsimmons, of Edmonton, President of the Northern Alberta Conservative Association and other speakers.

THE CANADIAN PIG

The outstanding performance in the market during 1933, outside the 14th Annual Review of the Live Stock Market and Meat Trade, issued by the Department of Agriculture, was given by pigs, which, save for one odd lapse, showed an unusually strong price position under the influence of a rising British market. Early in 1934, prices for hogs reached a price higher than any previous time since early 1931. With regard to Canada, the further success of the United Kingdom's ambitious promoting domestic and bacon industries is of first importance to Canada. The Dominion is making very definite progress in pigs, and pig products improvement, and expects to sell an increasing quantity of bacon and ham to the United Kingdom, and on improved selection. British price levels, and the exchange level, are most important factors.

THE CHURCH OF ENGLAND IN CANADA

WORLD HAPPENINGS
BRIEFLY TOLD

The House of Commons in committee of the whole, approved the amendment to the gold tax moved by Hon. E. N. Rhodes, finance minister.

The disarmament conference adjourned June 12, for a long "breathing space." In which governments will attempt to settle outstanding political difficulties.

Expansion of the British air force, announced some time ago, contemplates the addition of 50 squadrons, totalling roughly 600 machines, it was learned.

Fire of unknown origin destroyed the Quaker Oats elevator at Delisle, Sask. More than 9,000 bushels of grain in the house were ruined. The loss was covered by insurance.

John Duncan, veteran railway telegrapher, died recently in Toronto, aged 91. He succeeded to the job of the late Thomas Alva Edison, famous inventor, held as telegrapher on the Northern Railway.

The Victoria Daily Times, first published on June 9, 1884, celebrated its golden jubilee by publishing a special anniversary edition. The paper was founded by the late John Grant, M.L.A. for Cassiar at the time.

Declared as a record without rival in book selling in South Africa, 150,000 copies of the new Afrikaans Bible have been sold in the South African Union and the Rhodesias since its issue a few months ago.

Soviet Russia's crop sowing plan for this year was 98.3 per cent. complete the first week in June. On that date 228,325,000 acres had been seeded. It is the largest area ever cultivated by the Soviet Union.

Market For Timothy Seed

Shortage In Production Is Opportunity For Western Growers

Domestic production of timothy seed in Canada is still far short of consumption, it is noted in a report of the Saskatchewan Department of Agriculture, indicating an opportunity for growers in the West. Timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 6½ cents per pound for the seed basis No. 1 grade, over the past three years. Canada uses annually about ten million pounds of timothy seed and until 1931 some nine million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some five million pounds in 1932, but declined to about 2,700,000 pounds in 1933.

Problems Of Cattlemen

Efforts Made To Revive Western Beef Producers' Council

Efforts will be made to revive the Western Beef Producers' Council, it was announced by Jack Byers, manager of the Western Stock Growers' Association. The decision to re-establish the council, with British Columbia and Saskatchewan representatives on the board, was made at Calgary during the annual convention of the association, it was stated by Mr. Byers. The council would deal with all problems of Western cattlemen, paying particular attention to export business.

The Western Stock Growers' Association, following resolutions adopted at the convention, will ask the Dominion government to include feeder cattle in any new trade agreements made with the United States. It will also ask the federal marketing board to take 100,000 head of the lower brand of beef cattle marketing out of domestic consumption channels.

British Postal Profits

Beats Its Own Profit Making Surplus Of Last Year

Figures recently released showed the British post office had beaten its own profit-making surplus of last year, the surplus now announced being over \$60,000,000 an increase of \$6,250,000. This was mainly due to the successful campaign to popularize the telephone, which England is used less than in Canada and many other countries.

The success of the telephone is partially at the expense of the telegraph, apparently, for the latter department shows a loss of around \$5,000,000.

"Did any of your ancestors do things to cause posterity to remember them?" asked the haughty woman.

"I reckon they did," replied Farmer Contonable, "my grandfather put mortgages on this place that ain't paid off yet."

Coal wrapped in paper packages of convenient size to toss into the furnace is now being sold to eliminate the dirt and dust in handling the fuel.

England is on the verge of the greatest agricultural revival of the last fifty years.

W. N. U., 2021

Air Mail Across Canada

Coast-To-Coast Airmail In 10 Hours Is Predicted

A coast-to-coast air mail service in 10 hours, travelling in aeroplanes capable of flying the sky lanes from Montreal to Vancouver at a speed of more than 200 miles an hour, is the hope of Canadian airmen.

Squadron Leader A. T. Cowley, superintendent of air regulations, when in Calgary on an inspection tour, outlined plans for the fast mail service of the future—to be put in operation when economic conditions are better.

The proposed route would take a western aerial trail via Regina, Lethbridge and the Crow's Nest pass to Vancouver, making a direct mountain crossing to the coast. A branch service would be maintained from Calgary to Lethbridge.

Raining Gold

Unusual Phenomena Is Reported In India As Result Of Earthquake

The world may talk of gold standards and gold hoarding but in India it has been raining gold. Outlying districts in which seismic disturbances were felt recently, reported a shower of fine powdered gold and told stories of golden clouds of dust floating low over the country side.

The secret of the color of the dust was revealed when scientists analyzed samples and discovered that the dust harbored fine particles of the precious metal. The dust clouds came as a result of the earth shocks which the scientists suggested forced into the air delicate particles from deep rock fissures.

Television Theatre

First In The World To Be Opened In England

The first television theatre in the world will open soon at Blackpool, England.

The theatre, which will hold 3,000 spectators, will show news reels of events in England and Ireland on a screen 20 feet square.

If the experiment succeeds, television theatres will be opened throughout the country.

Would Do Magic Trick

Psychiatrist From India Makes Offer To London Society

For \$275,000 a psychiatrist in London from India will do the magic rope trick in Albert hall, but so far he has no takers.

The Magic Circle, a society that investigates phony mysticism, recently offered a \$25,000 reward to anyone who will do a genuine magic rope trick. At that time Lord Ampthill, an expert on magic, said the reward might just as well be \$250,000, because no one could do the trick.

His pronouncement brought from Dr. Alexander Cannon, the psychiatrist, an offer. The doctor will do the trick for the original reward with the \$250,000 added to cover expenses. He needs that much money, he said in a letter to the Magic Circle, because he would have to report vagabonds and their assistants from India, bring over special sand and heat Albert hall to the temperature of the tropics. He would also need special lighting effects.

Interested, the Magic Circle wrote Dr. Cannon and asked him if he would return the \$250,000 if the trick failed. He replied "no." The Circle appeared ready to let the matter drop, but the doctor wrote again and repeated his offer.

In the magic rope trick a faker throws the end of a rope into the air where it appears to become anchored to nothing. Then a boy climbs up.

An Admiralty Court

Canada Has Passed Another Constitutional Milestone

Canada passed another constitutional milestone recently when the House of Commons gave third reading to a bill designating the exchequer court of Canada as an admiralty court. Admiralty litigation has been heard for years by the exchequer court but under an Imperial Act. The 1929 conference on merchant shipping legislation reported control of admiralty courts was not in accord with the constitutional status of the Dominions as established at the 1926 Imperial conference.

The bill, sponsored by Minister of Justice Hugh Guthrie, gave Canada control over admiralty courts and set forth the necessary regulations. It passed through committee stage in less than five minutes and passed the house without opposition.

Negro Undertaker (over telephone): "Rastus, your mother-in-law just died."

Rastus: "Is you sure 'bout dat?"

Negro Undertaker: "Shall I bury her or embalm her?"

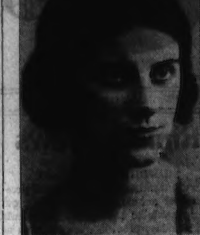

Rastus: "Don't let's take no chances, brother. Cremate her!"

Each leaf on a tree has on it a number of pores, which open and shut to regulate the evaporation of excess moisture.

A new invention consists of a tiny flashlight fastened to a bunch of keys, enabling one to find the key-hole on dark nights.

BEREAVED

Lady Peel, better known as Beatrice Little, Toronto-born stage actress, whose husband, Sir Robert Peel, passed away on the eve of his thirty-sixth birthday.

An Uneventful Record

United States Leads With Total Of 10,817 Murders

The lowest per centage of murders goes to the credit of Holland, with 1.06 per cent. The highest is to the discredit of Chile, but the highest total is recorded in the United States. In Chile, during 1932, the last year for which statistics are complete, there were 2,913 murders, equivalent to 16 per 100,000, or one murder every three hours. The United States show 8½ per 100,000; the total is 10,817. The highest per centage in Europe goes to Belgium, with 1.86 murders, but Germany has the largest aggregate (1,223) though this averages only 1.88 per 100,000 of the population. In the nine countries under review the total murders amounted to no fewer than 16,108.

The Panama Canal

Building Made Possibly Only Through Concessions From British

Arthur Brisbane, protesting in the Hearst papers against Great Britain's failure to pay her debt to the United States, suggests that the Panama Canal rates might well be doubled against her. But the Panama Canal was built under an international agreement whereby the rates for British and American vessels would be the same. It ought not to be forgotten that the building of the canal was only made possible through certain British concessions. — Toronto Mail and Empire.

To Tour Canada

A party of British industrialists and representatives of manufacturing and distributing organizations will tour Canada this summer, concluding their trip by attending the Canadian National exhibition at Toronto, Aug. 27 and 28. A large promoter of the visitors, it was stated, will be representative of organizations engaged in distributing food products in the British Isles.

Glasgow, Scotland, has banned Sunday games in public parks.

Fair Wage Schedule

New Rating For Manitoba Applies To Private As Well As Public Works

Hon. W. R. Clubb, Manitoba minister of public works and labor, recently announced a new fair wage schedule for the province, applying for the first time to private as well as public works and containing reductions of from five to 10 per cent. from last year's rates for a large section of the building trades.

The new rates became effective June 15 and were worked out after two months' study by the fair wage board. One set of rates is for Winnipeg and territory within a 30-mile radius and another for the rest of the province.

Stone masons have been allotted two rates, 80 cents and \$1 an hour, as against last year's rate of \$1.05.

Melons Save Bank Notes

Unusual Happening In Fire At Constantinople Law Courts

A few weeks ago a great fire destroyed the Law Courts at Constantinople. The damage done was very heavy, but the chief concern of one official centred in a safe in which he had placed funds to the value of \$5,000. Ultimately the safe was located amid the debris, and to all appearances it was a mass of warped metal, but the door was forced, and it was found that the money placed there by the cashier could be saved. The official had placed in the safe two large melons and they had given off sufficient steam during the fire to prevent the complete destruction of the notes. Some damage had been done but the numbers of the notes were visible and the State Bank accepted them.

New Marketing Board

Appointed In British Columbia To Improve Sheep-Raising Business

In order to facilitate proper marketing of lambs, a marketing board has been appointed in British Columbia. This board will be known as the B.C. Marketing Board, and will work with the Dominion and Provincial governments in the future, in order to bring about many improvements in the sheep raising business in British Columbia. William Harrison, S. H. Ford, George Dalziel, Robert Heron, L. Hoover, and George Hay make up the personnel of the board.

Beacon For Aircraft

Illuminated Fountain At Essex, England, Is Prominent Skyline

"Pillars of light will shine forth nightly in Essex, England, for the guidance of mariners and airmen." A pillar of colored lights nearly 100 feet high provided by an illuminated fountain rising apparently from the sea will be a prominent skyline of St. Leonards during the coming summer nights. In fine weather it will be visible from the French coast, and will be a beacon for aircraft using St. Leonards airport.

Austria is discouraging the importation of foreign automobiles.

The Futility Of Force

People Beginning To Realize Difficulty Of Defeating By War Enemies Whose Will Is As Strong As Their Arms

Recently it has been the habit of the cynical to scoff at the promise of a "war to end wars" which animated the patriotic impulse of 1917.

Manifestly that promise has not been realized. Seventeen years after the great war in America began to advance upon Europe's battlefields the nations are still armed, military budgets are increasing and the same sort of rivalry of national interests which devastated the world in the years after 1914 again disturbs the thoughtful. Life is rash who predicts there can be no more wars.

But in spite of the dark clouds over many a frontier, there is a growing realization of the futility of force as a method of settling international differences. More than that, there is an increasing disposition even by those who ignore the humanitarian considerations, to question if war can successfully further national aspirations; to doubt if conquest can pay.

All this is encouraging to those friends of peace who are proud to wear a uniform as well as to those who demand the extreme in disarmament and for conscience sake are content to be counted pacifist.—Cleveland Plain Dealer.

Penalty Was Heavy

People Hanged For Smuggling Not Many Years Ago

"Within the memory of the present generation the penalty for smuggling was hanging," declared Magistrate William T. Malkin in Fort Erie police court, in response to a question by a defendant in a smuggling case as to why severe penalties were inflicted.

"Customs regulations have always been regarded as important ones," the magistrate said, in disposing of the case, "for they affect the revenue of the country. To violate them is tantamount to stealing; and so important are these to every business in the country, persons so engaged are compelled to arrange such businesses accordingly."

Little Journeys In Science

RADIUM

(By Gordon H. Quest, M.A.)

In 1910 Madame Curie culminated many years of efforts, when she succeeded in isolating radium and giving to the world the discovery of that radio-activity. This French lady has since become a figure of international importance for her work in connection with radium. Of Polish origin, she began the work with her husband, Pierre Curie, a professor of physics at the Sorbonne, in Paris. To-day she still directs radium research in the Radium Institute, on the Avenue Pierre Curie, in Paris. This institute was built as a memorial to Professor Curie who died in 1906, and who carried on his studies in radio activity, under the direction of Madame Curie.

Radium is taken from pitchblende, where it occurs in very small quantities. It is estimated that "three tons of pitchblende, which is sometimes called uranium oxide, contain about one gram of radium. The world supply of radium is said to be about 170 grams, and the chief source of supply is in the Belgian Congo. It was at first valued at from \$100,000 to \$125,000 a gram, but with the discovery of new sources of supply it has come down to \$50,000 to \$70,000 per gram. At the Radium Institute are two grams of the substance, one of which was procured by the Curies in their early work, and one of which was presented to Madame Curie by the women of America when she visited this continent several years ago.

Radium, however, is a long lived substance. In spite of the fact that it gives off extremely penetrating rays of heat and light, it does not diminish appreciably in volume or strength, and it is said that one gram of radium would lose half its volume by radiation in 1700 years. Through these calculations scientists have been able to do determinations on the age of the earth, through the study of the radioactive substances found on its surface.

Because of the extremely strong powers of penetration possessed by the rays given off by radium, it has found many uses in science and industry. Outstanding is the development of its use in the treatment of some types of cancer and of numerous skin diseases.

In industry it is used in the production of a luminous paint, familiarly seen on the faces of clocks and watches. In recent years large deposits of pitchblende have been discovered in Canada, in the region of Great Bear Lake. The Curie Institute is expected that within the next few years this deposit will increase the world's supply of radium sufficiently to bring down the price considerably.

Appreciates The Press

It is well to know that there is at least one man in public affairs who appreciates the value of the press, says the Lethbridge Herald. This is Lord Londonderry, Secretary for Air in the British government. Speaking of the British press, he said: "We find the press men fair and helpful, sparing in their criticism and generous in their praise." This regarding the press in the light it deserves to be regarded.

Wage strikes in Australia are increasing.

Grass growing under glass has become a very important industry.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The quick-freezing methods of preserving food still presents many problems for the plant breeder and the research chemist.

The highest grade alfalfa and clover meals are associated with bright green color, those of poor quality are orange and yellow.

The use of resistant varieties of sweetens seems to be the best way of combating club-foot disease of those turpins.

As an average of all Eastern Canada, there were by the 1931 census only 41.3 acres in crop per farm which varied from 24.2 acres in Nova Scotia to 50.1 in Ontario.

According to a survey of Eastern Canada, two-plough tractors ploughed four times as much per day as two-horse teams, and at a cost of \$1.20 less per acre.

Experiments are under way on Pacific Coast transport ships to test the feasibility and economy of using "dry ice" (solid carbon dioxide) as a refrigerant for foodstuffs in transit by water.

A new process of sterilizing ice has just been developed in Germany. The sterilized ice is named "activated ice" to distinguish it from ordinary artificial or natural ice.—Cold Storage News Letter, Dominion Department of Agriculture.

The silvershield or fish moth is becoming increasingly notorious as a household pest in Canada, particularly in urban sections of Ontario and Quebec. These moths have a special liking for artificial silk (rayon) products.

Disintegrated peat is finding an important place in the top dressing of golf courses and lawns. Its value for these purposes is greatly enhanced if it is first composted with a good loam and a small quantity of manure, and the resulting product screened.

In the Maritime provinces and Quebec mud deposits have largely been used in the past for soil enrichment. Good results as a rule followed the first application, but it was found in many cases that there was little response from repeated and continued applications.

The gypsy moth which has cost the New England States an enormous amount of money in keeping it under control was first found in the States of Massachusetts in 1859 but it was not until 1924 that it gained an entry into Canada in spite of the efforts of the officers of the Dominion Entomological Branch.

In purchasing a fish meal, the guarantee should be carefully read, bearing in mind the desirability of the States of Massachusetts in 1859 but it was not until 1924 that it gained an entry into Canada in spite of the efforts of the officers of the Dominion Entomological Branch.

Canada imports millions of pounds of dried apricots. Recent investigations at the Dominion Department of Agriculture Experimental Station at Summerland, B.C., have shown the possibility of proper varieties, cultural and processing methods which may make Canada independent of outside sources.

Soybean flour, on account of its extremely low starch content, is especially valuable for diabetic reasons. The flour is being successfully used in making bread, biscuits, muffins, pastry, etc., and by reason of its composition increases the nutritive value of these products.—Soybean Bulletin, Dominion Department of Agriculture.

Employment By Forest Industries

In Normal Times Annual Wage Bill Amounts To \$250,000,000

During the five-year period 1926-30 (which may be taken as a fair sample of normal conditions in the Dominion) the cutting of wood in the forest and the manufacture of this wood in the lumber and related industries provided work, on a yearly basis, to 244,000 people; that is to say, if the work had been spread over the entire year that number of people would have been employed all the year. Much of the work, however, is of a seasonal nature, so that the number actually employed in these industries was much greater. The annual wage bill amounted to about \$250,000,000—over forty-two per cent. of the value added to the lumber by manufacture. These figures are given out by the Forest Service, Department of the Interior, as the result of their investigation of the matter and are published in the pamphlet "Forest Facts, 1933" lately issued.

Only One Each

There were 12½ million dozen chocolate bars made in the press in 1932 and 1½ million dozens confectionery bars. The total seems a large figure in itself but it represents an average consumption of less than one and a half bars per person per month, says the Kingston Whig-Standard.

Ananas got his reputation where there wasn't much competition. He'd scarcely be noticed now.

A new alloy of nickel, chromium, and iron is reported to be stainless and resistant to heat and acids.

TOWN OF LACOMBE

NOTICE

TAKE NOTICE that it is the intention of the Council of the Town of Lacombe to undertake the construction of a sidewalk on the west side of Alberta Street from Barnett Avenue north to the continuation of Bailey Avenue as a local improvement in accordance with Section 334 of The Town and Village Act, 1924, 75 per cent. of the cost of such local improvement to be borne by a special assessment against the lands benefitting thereby, and the remainder to be borne by the Town at large. AND FURTHER TAKE NOTICE that it is the intention of the said Council to raise the sum of one thousand (\$1,000.00) dollars for the purpose of repairing certain sidewalks in the said Town of Lacombe, the cost to be borne by the Town at large.

Dated this 23rd day of May, 1934.
Lewis P. Minkler,
Secretary-Treasurer

GOLF TOURNAMENT
Lacombe's Fifth Annual Golf Tournament will be held next Wednesday and Thursday, July 18 and 19. This tournament is open to all amateur golfers and good prizes are being offered in the different events. A large number of golfers are expected from outside points and with local entrants, the tournament should be a large one. The Lacombe course is in perfect shape for this event, the recent rains making the fairways perfect. Prizes will be given as follows: Prize for best score in the Qualifying Round; Individual Cup and two prizes in the Championship Flight; 2 prizes in each Additional Flight; Commemoration for each Flight. There will also be a Long Driving and Approaching and Putting Competition. Entries to be in the hands of Secretary by 8:30 a.m., July 18. Entry fee of \$2.00 covers all competition. Lunches will be served at the Club House all day. D. Hay, President and G. T. Jackson, Secretary assure everyone of a real day of golf.

HAIL HITS RED DEER
At Red Deer on Tuesday gardens were flattened and windows were shattered by hail. For a stretch of 50 miles from there to Stettler, directly east, crops suffered damage estimated at 50 to 100 per cent from hail. The hail was reported to have lasted in 10 years.

At Coronation, Alberta, a wind of Cyclonic force left the town without telephone communication, and blocked a road north to Bulwark, Alta., with fallen telephone poles. Electric light and power lines were damaged and several small buildings moved about. Days cheered the victims of the drivers, compelling them to draw up at the sides of the roads.

KILLED BY LIGHTNING AT EDMONTON

One man was dead, another in hospital, and heavy damage to property and crops was recorded as a result of a storm which swept through the Edmonton district and southeastern Alberta into Saskatchewan late Tuesday.

W. D. Speechley, 27, of Lynnburn, Alta., was killed and David S. Hepler, also of Lynnburn, was injured when a lightning bolt struck them as they walked on Portage Avenue shortly after 7 p.m. Hepler is in hospital and physicians said he would recover.

DEATH OF MISS McLEAN

Miss Nellie McLean, for many years a respected resident of the district, died at Vancouver on Monday. The funeral will be held Friday afternoon, interment being made in Lacombe cemetery.

STORM KILLS STOCK

The hailstorm Tuesday night did great damage to the Delburne district. Many farm animals were killed at Delburne, one farmer losing seven horses. At Stettler, hail was a foot deep.

At Canstor windows were broken by the hail. The Canstor hospital had 24 windows shattered.

A horse was killed by hail in the Canstons area.

DISTRIBUTION WITHOUT WASTE

Lacombe Morrison & Johnston, Lt Bentley

Take Advantage of Good Weather for Harvesting!

The John Deere Tractor Binder Saves Time and Labor

Harvest days are uncertain days so far as the weather is concerned. But when you reduce by half the number of days required to cut your grain, you reduce your chances for loss by a considerable percentage.

With the John Deere Ten-Foot Tractor Binder, you can actually cut twice as many acres in a day as you can with an eight-foot horse-drawn binder. That's a mighty big advantage, you know. You cut when the crop is just right—you get the grain into the shock when the weather is right. Likewise, you make an appreciable saving in time and labor.

With the John Deere Tractor Binder you are better equipped to handle heavy crops and crops that are tangled or down. In wet ground and in loose soil, too, this binder handles the harvest faster, easier and with less waste. The reason for this is that the speed of the binder mechanism is controlled independently of the speed of the tractor, assuring steady operation under any condition.

Standard John Deere high-quality materials, workmanship and design assure trouble-free service and long life.

There are many more improved features. Drop in and let us explain them to you when you are in town.

More time for the THINGS YOU LIKE

The time you save with Kellogg's Corn Flakes gives you more leisure to do things you enjoy. No cooking. No trouble to prepare. Just pour these crisp golden flakes into bowls, and breakfast's ready!

Kellogg's are so appetizingly crisp—so delicious in flavor—that everybody likes them. They're nourishing too. Rich in energy and easy to digest. An ideal lunch. A splendid evening meal for children. Serve with milk or cream and a bit of fruit.

There's real economy in buying Kellogg's Corn Flakes. They save fuel as well as time. And the red-and-green package, holding many servings, costs but a few cents. Always oven-fresh in the heat-sealed WAXTITE inside bag—an exclusive Kellogg feature. Made by Kellogg in London, Ontario.

Kellogg's CORN FLAKES

Your Summer & Holiday Needs are Here!

Bathing Suits

Jantzen's Bathing Suits for Men in one-piece and two-piece styles and one-piece trunks. Latest color combinations. The prices are lower.

Summer Trousers

The best in Tweeds and Flannels, and prices so low that you will be surprised.

Summer Sweaters

Light weight in Turtle and V-neck style in popular colors. Prices from . . \$1.00 to \$2.95

Ladies' Bathing Suits

Ladies' Bathing Suits in one and two-piece styles. All the popular styles. Square Back, Basque, Kerchief, Criss-Cross and Prom. Latest color schemes.

Footwear for Summer

The latest in Sporty Shoes in color combination and plain; also a full line of Tennis and Golf Shoes.

Panama and Straw Hats

In all the latest shapes and banding. We have your size.

"Fresh from the Gardens"

War Debt Revision Looms

Great Britain's action in deferring payment of the \$261,701,000 instalment due the United States on June 15, has thrown the whole war debt problem again prominently into the field of international controversy. It poses the United States government with the inescapable necessity of initiating discussions preliminary to a complete review of the war debt situation. It forces a showdown.

Great Britain, of course, will not be satisfied with a mere review. It wants revision of the terms of settlement—revision drastically downward. It wants as much consideration from its creditor, as it (a creditor) has given its debtors. At the very worst, it seeks as generous treatment, on principal and interest, as was given France and other countries by the United States.

In failing to make even a so-called "token" payment on the instalment due June 15, Great Britain informed the United States that the terms of the agreement between the two countries in respect of war debts imposed "a burden which was both unreasonable and inequitable in relation to other countries." The facts justify this statement. Whether intentionally or not, Britain has been adversely reviewing the United States.

Great Britain, according to the records, borrowed \$427,000,000 from the United States, a large part of which was not for its own use, but on behalf of allied countries during the war. The money was paid in the United States for war material and was the real foundation of the extremely high wages paid munition workers in that country during the war. Since the Baldwin agreement which fixed the terms and conditions of repaying the war loans, Great Britain has made instalment payments aggregating \$2,025,000,000. Because of the high comparative interest rate paid by Britain, however, London is still indebted to Washington in the sum of \$4,713,785,000. That is to say, after paying back more than two billion dollars, Britain still owes more than the original debt.

Obviously, the situation clamors for reasonable adjustment from that aspect alone. There are other, equally cogent, reasons why revision should be made. There are irrefutable arguments why the debt problem should be solved finally and amicably. That war debts should remain a subject of international controversy, cropping up periodically to stir prejudices and animosities, is a reflection upon the intelligence of the two great English-speaking nations towards whom the world looks for preservation of concord among the countries of the world.

Great Britain's agreement to pay instalments in the amount of approximately \$262,000,000 was predicated, in the first place, upon expectations of a similar amount being paid by France and other European countries in respect of war debts due London. Britain lent more than she borrowed. In order to avoid financial and economic chaos, however, the British government decided to support all claims against debt nations for payments on war debts, and takes the position now that, if it must pay the United States in full, it must exact payment of a corresponding amount from its own war debtors. The position is quite understandable—and undoubtedly reasonable.

"Such procedure," said the British note to Washington, "would throw a bombshell into the European arena which would have financial and economic repercussions over all five continents, and would postpone indefinitely the chances of world recovery."

Consequently, Britain politely suggests the United States should do its bit "to speed world recovery by recognizing the realities of the situation and revising present agreements on a payable basis."

The question is not that Great Britain is anxious to escape payment of its indebtedness. Suggestions have emanated from London, from time to time, for liquidation of the entire obligation by lump sum payment. Washington has not viewed this suggestion favorably, heretofore. In fact, an intransigent position has been taken by some of the most vocal of American legislators who take the "pound of flesh" viewpoint. Furthermore, Britain's failure to make even a payment on account—the "token" payments such as were made in June and December 1933—has been attributed to the Johnson Act, passed this year, which specified that any nation not making payment in full on the due date, would be considered as in default.

The British note is couched in language which the people of Western Canada will appreciate and approve. It strikes a mainly note of independence and forthrightness. While declaring payment would be deferred until "it becomes possible to discuss an ultimate settlement of inter-governmental war debts with a reasonable prospect of agreement," the note asserts the British government has no intention of repudiating its obligations.

Canada's Motor Vehicles

Would Make Parade Of 20,000 Miles In Length

The motor vehicles of Canada if mustered out in one monster parade with a hundred feet of highway allowed to each vehicle, would form a procession over 20,000 miles in length—four-fifths of the distance around the world at the Equator. With a little crowding and utilizing the trucks and buses, the whole population of Canada might be carried. Such a motorcade, in motion, would consume more than 50,000 gallons of gasoline for each mile of travel—Canada Week by Week.

Japanese Trade Invasion

Now Penetrating Traditional United States Markets

Japan's steady successful invasion of traditional United States export markets was disclosed in the department of commerce annual world economic review for 1933. The report showed larger Japanese shipments of competitive articles to the United States, big export increases to Latin America, a Japanese victory over American manufacturers in the battle for the Philippine textile trade, and increasing sales in Europe, Africa and elsewhere.

A radio invention makes it possible to control a driverless automobile. And now we want an invention that will control a car with the driver in it.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue a day or two, and you may become weak and prostrated. Just as soon as you feel any looseness of the bowels, at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening loosens.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 88 years.

Making China Seas Safe

Marine Department Continues Work To Provide Guidance For Ships

Typhoons do not tell the whole story of the China Seas. Fog may assail the shipping on the Chinese coast at almost any time, and is independent of the typhoon are frequent. The coast itself is as dangerous as the sets of its tides as treacherous as any in the world. Casual islands and shoals demand the utmost vigilance, and the seamen who man Chinese junks are no mean masters of the ancient craft of navigation.

The lighting of the China coast is not a century old. The National Lightship Service was founded about the middle of the nineteenth century by Sir Robert Hart, who was authorized by the government of the day to start a system of lighting for the benefit of navigation. Sir Robert possessed himself of a few qualified experts, and he and his handful of foreigners established the nucleus of a service which, in the Chinese Maritime Customs, now provides guidance not only to ships at sea but to the countless craft navigating the rivers of China and in particular the Yangtze.

The romance of the Marine Department of the Chinese Maritime Customs has yet to be written. This organization, originated by Sir Robert Hart and his devoted helpers, has developed unobtrusively, and its traditions and efficiency have been maintained by successive inspectors-general.

For the last five years or so bandits have ravaged the staff engaged in marking out channels for navigation. They have removed beacons and buoys—which have been promptly restored—and have subjected the Customs launches to such assiduous malignance that the staff engaged now have to be protected by metal plates and shut up like sardine tins. Near Anking, the capital of Anhwei, there is Christmas Island, a favorite spot for the bandits in the Lower Yangtze. The robberies of "lightships" or lightboats occurred there in 1931.

But the work proceeds, the course is kept open. The Tungting Lake has been lately surveyed. Improved marks have been established and the river inspectors have added to its store of knowledge and given it to the river public in thousands of notices.

Chinese Have New Idea

Radio On Coffin Broadcasts Music

It remained for China to extend the din of the radio to the grave. With fifty-eight broadcasting stations in Shanghai alone, it seems the mark of modernity to possess a receiver. Now it has been added to the grave equipment of the dead. A long funeral procession winding its way along the streets of the port city had a radio fixed to the coffin, and as the mourners marched, broadcasts from local theatres, love songs and dance music lured the occasion.

It has always been the custom in China to place paper images of serving men and maids, paper money, imitation cloth, trees, carriages, motor cars, aeroplanes and most every other form of human comfort either in the coffin or to burn it in the grave.

In the case of those fond of painting, scrolls and materials in real form were buried. Musicians had actual instruments placed in the coffin. However, this instance is the first on record that a radio set in operation rode astride the coffin, blaring out during the funeral.

Nevertheless, the family took no chances on not having enough music. Besides the radio, there were at least two western type bands and a group of gowned priests playing the softer flutes and horns. All varieties played at the same time and there was music enough for the deceased, not to mention onlookers and mourners.

Flag Made By Prisoners

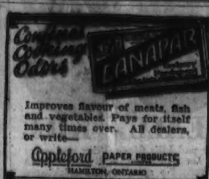

Union Jack Secretly Made In German Camp During War

Made in a German camp during the World War, a British Union Jack was used during the unveiling recently of a memorial in Manchester, England. E. P. Officer James Allen, who brought the flag home, said it was made by prisoners in Spruce, Siberia. "A Russian, who was allowed out," he said, "used to smuggle in a little bit of cloth at a time, and in the tailor's shop another Russian secretly made it up to the instructions of the British. We produced it first at the funeral of one of the British prisoners, and in all it was used on 21 such occasions. Only once did the Germans show any objection. The flag was drying on the wall, and when an inspecting general saw it he stopped, snarled, 'Shew! shew!' and passed on. Each member of his staff did likewise."

Are Unknown Specimens

Three crane flies, collected by King Leopold of Belgium, were received at Anherst College for classification by Dr. Charles F. Alexander, professor of entomology. The flies, unknown specimens of Tipulidae, are long-legged and slender, resembling mosquitoes.

Tennis became a sport more than 700 years ago, but in its beginning it was an indoor game and has been "lawn tennis" only since 1874.

Zoo Fatality

Lion In Cage Kill Victim As Horrified Spectators Watch

While a crowd of horrified spectators looked on, four lions in an open air zoo at Wilpena, 12½, killed a zoo employee who had gone into their pit to remove a visitor's hat.

The owner of the hat said several other persons who tried to save the victim, Stanley Lewis Stenson, were driven back by the lions, two of which were eventually killed by keepers before they could rescue Stenson's body.

Stenson, employed in the catering department of the zoo, apparently decided suddenly to attempt to retrieve the hat and went into the enclosure between the outer barrier and the railing surrounding the pit in which the lions were kept.

As he crawled along the top of the inside railing two of the lions reached through the bars and began mauling him.

Stenson was unable to get away from the lions' claws and several spectators went into the place to try to pull him away, but were not successful as the two other lions joined in the attack through the bars.

Stenson then fell into the pit, striking his head on the concrete about 10 feet below. The lions dragged him further into the pit and killed him as the horrified spectators screamed and several women fainted.

The keepers had to shoot two of the lions before they were able to drive the others into their cages at the far end of the pit.

Recipes For This Week

(By Betty Barclay)

HOT MILK SPONGE CAKE
(3 eggs)
1 cup sifted cake flour
1 teaspoon combination baking powder
¼ teaspoon salt
3 eggs
1 cup sugar
2 teaspoons lemon juice
6 tablespoons hot milk
Sift flour, salt, measure, add baking powder, mix and sift together three times. Beat eggs until very thick and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn out into greased 8x8-inch pan and bake in moderate oven (350 degrees F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour, or until cold.

This mixture may be baked in two lightly greased 8x8-inch pans in moderate oven (350 degrees F.) 25 minutes; or in 12x8½ inch loaf pan in moderate oven (350 degrees F.) 30 minutes. Or turn mixture in 36 small cup cake pans, which have been greased very lightly on bottoms, and bake in moderate oven (350 degrees F.) 20 minutes, or until done.

PEANUT BUTTER HERMITS

1 cup sweetened condensed milk
6 tablespoons peanut butter
¼ teaspoon salt
¼ cup graham cracker crumbs
Thoroughly blend together the sweetened condensed milk and peanut butter. Add salt and graham cracker crumbs. Mix well. Drop by spoonfuls on a buttered baking sheet. Bake fifteen minutes, or until brown, in a moderately hot oven (375 degrees F.). This recipe makes 1½ dozen.

Giant Among Aircraft

Britain's New Plane No Longer Shrouded In Mystery

The Scylla, Imperial Airways' new aeroplane and the world's largest land machine, has emerged at Croydon from the gloom of the hangar and the official mystery in connection with it. The Scylla is a 14-ton silver giant, one of two machines built by the same company.

She has a span of 113 feet, a length of 77 feet, is 29 feet high, accommodates 39 passengers and is driven by four Bristol engines, each of 550 horsepower. The fuselage, bigger than a railway coach, has three seats on one side of the aisle and two on the other. The seats are deep, comfortable armchairs. The cabins are soundproof.

In the Dominion Department of Agriculture survey on the coast of producing farm crops in Eastern Canada, 98 per cent of the tractor owners retained horses for row crop cultivation, haying operations, road hauling or other work for which the tractor type of tractor was considered not well adapted.

Grandma was helping Peggy make out a list of little guests for her holiday party.

"Peg about the Morton twins?" grandma asked.

"Well, there's no need to ask them both," Peggy answered, "they're 'sactly alike."

Germany ranks first in the number of motorcycles owned and operated.

Passes Into History

One Of England's Famous Inns To Be Torn Down

Passing of an old coaching inn, the Kings Arms at Kendal, will cause regret on the part of many people who have broken a journey to the lakes or to Scotland at the King's Arms. The inn, which has been closed and will soon be torn down to make way for other business, has had a long history.

It is first mentioned in 1696, when it was kept by a Mrs. Rowlandson, famous for her hot-pot. It has had many well-known landlords, one of whom, Alderman Christopher Penton, was four times mayor of Kendal—in 1788, 1774, 1781 and 1792.

The King's Arms was a well-known coaching house. The north staff arrived at 11:30 p.m. and the south staff at midnight. Horses were changed and there was a time for the tumbler of "fresh milk, one fair lump of sugar, two tablespoons of rum, with a passing thought of nutmeg grating on the top of all."

The King's Arms was famous for its food as well as its drink, and in 1841 the landlady gave the Commercial Travellers' Association for their Christmas dinner a pie which contained "two fat geese, two large turkeys, four fowls, two pheasants, four partridges, four prize rabbits, three tongues and several pounds of beefsteak and ham." Its circumference measured seven feet, and it was 10 inches in depth.

Many inns up and down the country could tell similar tales. The King's Arms was distinctive because it had not changed. The rooms, the staircases, the twisting and turning passages, and the mysterious changes in floor levels remained mercifully unmodernized. The two entrances to the yard remained as difficult for a motor car to enter as they had always been.

Finds Missing Seamen

Woman Has Located Thousands In Last Fourteen Years

Finding lost sailors is the job to which Mrs. Janet Roper, "Mother Roper" to seamen all over the world, devotes her days.

Mrs. Roper, gray-haired widow of a Congregational minister, who once lived in Saint John, N.B., is head of the missing seamen section of the Seamen's Church Institute of New York. She is also a first-rate detective and has located some 5,000 lost sailors since 1920.

Runaway boys whose pride will not let them write home, immigrants who have lost touch with their families abroad, seamen who have returned from long cruises to find their homes broken up—these are the men "Mother Roper" seeks and generally restores to anxious parents, wives or relatives.

Her list of missing seamen, compiled quarterly, is posted in seamen's gathering places in 300 ports. Men who see their own or a comrade's name on the list may call Mrs. Roper with safety for she will not lend her services to police seeking law violators. "I've been asked," she said, "but I refused because it would mean the end of my influence."

A man missing for 37 years, whose niece in Everett, Mass., wanted to get in touch with him, was one of her finds. "She said he was a man about 70, and I thought 'Sailors' Snug Harbor would be a good bet.' Mrs. Roper explained. "I found him there."

Mrs. Roper came to the Seamen's Church Institute 19 years ago. And she almost never rides on ships. "I like sailors," she said. "They're a lot like other people, and human nature's about the same. The sea has never got me, but you know what I did—the Canadian Rockies."

Giant Among Aircraft

Britain's New Plane No Longer Shrouded In Mystery

The Scylla, Imperial Airways' new aeroplane and the world's largest land machine, has emerged at Croydon from the gloom of the hangar and the official mystery in connection with it. The Scylla is a 14-ton silver giant, one of two machines built by the same company.

She has a span of 113 feet, a length of 77 feet, is 29 feet high, accommodates 39 passengers and is driven by four Bristol engines, each of 550 horsepower. The fuselage, bigger than a railway coach, has three seats on one side of the aisle and two on the other. The seats are deep, comfortable armchairs. The cabins are soundproof.

In the Dominion Department of Agriculture survey on the coast of producing farm crops in Eastern Canada, 98 per cent of the tractor owners retained horses for row crop cultivation, haying operations, road hauling or other work for which the tractor type of tractor was considered not well adapted.

Test Route To Arctic Posts

Hudson's Bay Company Plans To Ship Supplies From Edmonton

Testing out the Mackenzie river route, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region, according to Col. H. G. Reid, manager of the H.B. transport department for the north.

The shipments will be moved as early as possible down the Mackenzie river to Tuktoyaktuk harbor, on the Arctic coast, east of Akivik. At that point, the supplies will be loaded on a distributing vessel to be carried to posts in the Cambridge bay, King William Island and other parts of the western Arctic.

It is planned to start the distributing vessel on this trip by August 1 so as to give it time to complete its Arctic voyage and return to port before freeze-up.

From the standpoint of Edmonton and the northern route, this year's experiments are of importance as successful results will mean that in future the supplies will be moved northward from this city.

Several years ago the steamer Baychnino was frozen in and abandoned when carrying the season's supplies for northern posts round by way of the Pacific and Bering strait to the Arctic coast.

This route was used successfully the next year, however, but last year there was another failure and supplies had to be rushed north by way of Edmonton and the Mackenzie river to Akivik.

"The route from Vancouver through Bering strait is uncertain," said Col. Reid. "We think the Mackenzie river is more certain and for that reason are making this first experiment this year."

The difficulty of the Mackenzie route in the past had been to find a suitable trans-shipment point where the distributing vessel could meet the river boat, Col. Reid explained.

Due to sandbars at the mouth of the river, it obviously was difficult to bring a deep sea vessel into shallow water, while at the same time a river boat could not be navigated on the ocean, he said.

Last year, the Dominion government had co-operated with the company in making a survey of the Mackenzie river delta. The reports of that survey gave reasonable prospects of Tuktoyaktuk harbor being a suitable point at which the vessels could meet.

Native Son Of Jutland

Danes Setting Up Memorial Stone To Shakespeare's Hamlet

The Danes of Jutland have made clear their position—that they claim Shakespeare's hero Hamlet as a native son of Jutland—by setting up a memorial stone on the battlefield where he is said to have fallen. Some years ago a hotel-keeper in Elsinore, in eastern Denmark, labelled a local grave Hamlet's to the distress of Danes who knew their ancient history.

Denmark's oldest historian, who lived about 1200 A.D., declared that Hamlet after being crowned king fought a battle on Ammelde, or Hamlet's Heath, and was buried somewhere on the field.

The stone has been placed on a Viking mound in the field, though it is emphasized that the exact spot where the king was buried is entirely unknown. An excavation of the Viking mound failed to reveal any sign of burial. The inscription on the stone is translated as follows:

"Amled, played of all in Viking days, layest the foot until the hour of revenge. Hailed as king by the Jutes, he rests on Ammel Heide."

Working To Lift Debt

Farmers Members In Prairie Town Show Loyalty To Church

An increase in the grip of the Church upon the loyalties of the people of prairie Canada would seem to lie in a new item from a Saskatchewan hamlet.

There is a debt on this church of \$2,000—a little cash in sight with which to pay it off. But the church and its farmer supporters have decided to see what can be done. The church has obtained temporary possession of 50 acres of land in the territory it serves and this has been used to wheat, farmers supplying the seed and performing the labor. What cash proceeds this wheat will yield will be applied on the church debt. And all the farmer members and adherents of the church will set aside a certain portion of their own lands as a "church debt" area. These tracts have been seeded, and what is realized will be turned over to the church—Regina Leader-Post.

A Modern Diogenes
An "honesty door" is an unusual feature of Albert S. Pierson's home on Riverbank Road in Quincy, Mass.

Since the house was built two years ago, it has had three doors, but only two are used. The third door will not be opened, says Pierson, until he discovers a person thoroughly honest in all his dealings and thoughts.

Screws having square sockets instead of slotted heads are now being produced.

Approximately one-fourth of the habitable land on earth is under British control.

Feels 50 lbs. Slimmer

After Losing Only 5 lbs.

"I started taking Kruschen Salts a month ago," a young woman writes. "I have lost 5 lbs. in weight, and I feel as if I have lost 50 lbs. I am full of vigor, whereas before I was listless and worried over little things, but my troubles were doubled, but I would not worry me to-day—thanks to Kruschen."—(Miss V. P. Hervey's recipe that banishes fat takes one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.)

Be sure and do this every morning, for "It's the daily dose that takes off the fat." When you take Kruschen Salts it means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are tuned up, and the salts is carried to every part of the body. Then follows "that Kruschen feeling" of energetic health, and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

Invents New Material

Belgian Major Says It Will Make Airplanes Fireproof

Major Van de Rollebeek of the Belgian Army declares he has invented a material which will make airplanes fireproof. Plates of asbestos are soaked in three chemical baths and then baked at high temperatures. Tests were made recently near Brussels. To demonstrate its value documents were put into two boxes made of the new material, and these were plunged into a blazing fire for a quarter of an hour. The papers received no injury whatever. A miniature monoplane was also covered with this preparation and, soaked in gasoline and ignited, the flames burned themselves out without injury to the plane. To show his confidence the major sat for 10 minutes in the pilot's seat with the plane blazing all round him. The temperature in the cabin never rose above 74 degrees.

Shined Shoes Of Prince

Veteran Bootblack Had Many Experiences In Fifty Years

Hardy Bent, of Digby, Nova Scotia, veteran bootblack, once shined the shoes of the late King Edward VII, who was then Prince of Wales, and a visitor in Toronto. He will celebrate his 78th birthday in July.

A master of his trade, with more than 50 years' experience, he has shined "old stand" in the same place for the past 35 years. When he was younger he travelled, and shoes to which he applied polish and brush were the property of his employers in New York, Toronto, Halifax, Saint John, and many other cities.

"Hardy Peg," as he is called, says that he has seen lean years, but looks forward to a bright future because he is drawing an old-age pension.

Animals As Witnesses

Were Used In Sardinia Until Few Years Ago

Animals were used as court witnesses in Sardinia up to a few years ago. When a robbery, homicide or killed an alleged burglar he was brought to trial and made to swear that the homicide was justifiable. The oath was taken before one of his dogs, cats or birds that witnessed the killing. If the animal did not manifest some contradictory sign the prisoner was set free.

Movable Birthday Date

A Milwaukee man's sliding scale of birthdays brought dismissal of his application for an old age pension. He was listed as 45 in a life insurance policy, 58 in county relief records, 66 in his marriage papers, and 70 in his pension application. Seventy is the minimum age for eligibility to a pension.

If it wasn't for the help of a woman most self-made men would be out of luck.

DENICOTEA
CIGARETTE HOLDER
DENICOTEA Cigarette Holder absorbs the nicotine, reduces ammonia and resinous and tarry substances found in tobacco smoke.

Movement Of Low Pressure Area Has Decided Effect On Rainfall In Western Provinces

The thirst quenched, the drought is forgotten. A few showers of rain fall, and the refreshment of the soil allays the anxiety bred in the drought. The scare is forgotten. This fallibility is human, but it cannot divert the climatic cycles. These go their way, advancing or receding, they are beyond all laws, and either may be ruled by fixed phenomena or willed by Nature's unpredictable whims. Which of these orders our climate, none can say. The meteorologists cannot. They can, after all, record climate only as it reveals itself.

And the overwhelming climatic revelation in this part of the world in recent years is that its low pressure area has moved. It used to lie roughly, across the Kansas line. It has gone north, and is estimated to be far north of here, perhaps in the Barrens.

The movement of the low pressure area has definite climatic effects, which can be stated in simplest, though probably inexact, terms. The laden warm air from the Caribbean Sea provides the moisture for the centre of this continent. It rises up the west coast region, passing on northward across these prairies.

As this laden air reached the low pressure area, due process produced the rain that fell on the prairies. Without that low pressure area, above which the warm air rose, there could not be the distilling process, and there would be no rain. So, when the low pressure area moved, the moisture in the air from the Caribbean was not distilled, but fell, unaltered, unaffected, beyond us. The rain that ought to have been falling on us for the last few years is presumed to have been falling far north in the Barrens.

Why the low pressure area has moved is not explained. When it will return, or that it ever will return, or whether it has any cyclic rotations, is not known. Its movement, whatever its cause, is independent of human motives. It cannot be stayed, and it cannot be replaced. Whether it has moved to its southern latitudes, or whether it ever will, the scientists seem unable to say.

The present rain may be a result of a return of the low pressure area to a line south of here, but there is nothing to insure that return remaining fixed. But if it has returned, and means to stay put, the consequences will soon assert themselves on the meteorological charts.

The laden air from the south, will have its moisture extracted to drop in freshening rain on our fields, again to germinate our seeds and give the yields of our culture. The relief is a boon, a blessing, but it depends on the degree of fixity of the low pressure area, so long as that stays south of us, our fruitfulness shall not be stinted. Should it persist in staying far north of us, drought must continue over the centre of the continent, as it has done more or less for the last few years.—Winnipeg Free Press.

Saskatchewan Game Fish

Now Taking Trout From Lakes That Never Had Fish Before

Canada now has game fish in formerly barren lakes in the Maritime and prairie provinces, and in British Columbia, J. A. Rodd, director of fish culture, Dominion department of fisheries, told the senate committee on sealing and fisheries.

"Fishermen in Saskatchewan are now taking 10-pound trout from lakes that never knew fish before," Mr. Rodd stated. "European brown trout were transplanted to the Cypress lakes, Saskatchewan, in 1931, and Regina fishermen are taking trout up to 10 pounds."

"Walden" near Lake Winnipeg were transplanted to the Quill lakes, Saskatchewan, which are highly alkaline," Mr. Rodd said. "These fish are propagating."

In Hudson Bay

The Toronto-Globe says one hundred years ago the boat was made that a "swift" passenger vessel was making the trip from Kingston to Toronto in sixteen hours. In those days also completion of the coast journey between this city and Hamilton "during daylight hours" was guaranteed. During the century there has been some speeding up both in land and water transportation.

Frog Disturbed Prisoners

Because the nocturnal croakings of an imprisoned frog disturbed the slumbers of county prisoners, workmen tore out the wainscoting of the basement walls of the county jail at Bellingham, Wash., in an effort to free the requested croaker. Sheriff T. C. Fraser ordered the frog hauled after receiving complaints for the past two weeks from prisoners.

Slow Waiter—"Have you ordered anything, sir?"

Disgusted Diner—"Well, I asked for Christmas pudding, but that was so long ago you'd better bring me a hot cross bun!"

A Primitive Sawmill

Picturesque Building Tucked Away On Edge Of Nova Scotia Lake

Five residents of Italy Cross, Nova Scotia, own on a partnership basis, one of the most picturesque lumber mills in existence. Situated on the edge of a lake, near railroad tracks it is hidden from view by fringe of spruce. It is operated entirely by water power and has been in use for more than 80 years. Since its construction in the early 30's it passed through many hands before it was acquired by the present owners.

Huge water boxes beneath the floor of the mill supply the power. Logs are drawn from the lake by a chain attached to the axle of one of these boxes which rotate freely when filled with water.

When a log has been placed in position upon a cradle the water is diverted into another water box which operates a cross cut saw held by a yoke. The yoke moves up and down and simultaneously the cradle carrying the log is drawn toward the moving saw. In rainy weather as much as 7,500 feet of lumber has been cut into two-inch boards.

Each shareholder operates the mill for three days, then gives it over to the next in turn. "When I'm waiting for my turn," says one of them, "I'm always praying for rain."

Chinese Show Good Sense

Association For Marriage Reform Adopts Some Sensible Rules

Guests at Chinese wedding parties must leave before 12 midnight. It was resolved at the annual meeting of the association for marriage reforms in Shanghai. Chinese weddings often plunge the families concerned deeply into debt and, in an effort to alleviate this expense, it was resolved "no wedding gift shall cost more than \$1, bachelorette at wedding shall not cost more than \$4 for each table of eight guests and no bands nor fireworks shall be used at weddings." In an effort to assist China's native industries, the association also resolved that "all dowries of brides and all wedding gifts shall hereafter be only native Chinese goods."

By Ruth Rogers

FREE AND EASY TO WEAR AND SMART! IT CAN HAVE PUFFED SLEEVES OR WEE CAPED SHOULDERS

Growing daughter will look adorable in this cute dress with its smart sophisticated lines.

A cool crinkled cotton in Chinese blue and white, no perfect 7-8-year-old, made the original model. It's so practical, and needs no ironing.

See we sketches! It can have we puffed sleeves or a caped shoulder—pattern provides for same.

Red plaided gingham, yellow pique, plaided seersucker, etc., are sturdy mediums.

For daintier wear, handkerchief-finish lawn, voile and batiste prints are attractive.

It's surprisingly simple to make it. Style No. 800 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 1 1/2 yards of 35-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Conserving Game In Africa

System Of National Parks Similar To That In Canada To Provide Sanctuary For Wild Life

The Minister of the Interior has just received from the Secretary of State for External Affairs, Canada, a concise report on the International Conference for the Protection of Fauna and Flora of Africa. At the conference, which met in London, the following governments were represented: Union of South Africa, Belgium, Great Britain, Egypt, Spain, Abyssinia, France, Italy, Portugal, Anglo-Egyptian Sudan.

The conference concluded that the natural fauna and flora of Africa were in danger of extinction or permanent injury and steps are to be taken for their preservation by the governments represented. Canada, in company with all other nations, would suffer from the destruction of these resources of Africa but the chief interest to Canadians in the delegates to the conference is that it was the unanimous conclusion of the delegates that the best way to preserve the fauna and flora was by the establishment of National Parks in representative districts within which areas the destruction of wild life and of flora would be prohibited.

The matter of the establishment of National Parks in virgin areas to preserve them in their primeval condition is in line with the foremost countries of the world. Moreover the fortunate thing is that Canada began this work early in her development with the result that it has been done in the most economical manner. In this way there are being conserved, both for Canadians and for visitors from abroad, areas of grandeur and loveliness containing indigenous animals and plants—resources which might otherwise have been completely lost to the nation.

Knight Manages Palace

Responsible For Much Of Domestic Efficiency At Buckingham

Sir Ralph Harwood, who received a K.C.B. in the New Year honours list, is responsible for much of the efficiency with which the domestic organization of Buckingham Palace is conducted. In the early days of Queen Victoria the system for running the palace was so chaotic that it led to "disastrous and incessant annoyance and distraction." It was not until after the war, however, that Sir Ralph was requisitioned from the Treasury to be appointed deputy treasurer of the household. The post was not a popular one, but in co-operation with Queen Mary, Sir Ralph succeeded in eliminating all sorts of wasteful practices, with the result that Buckingham Palace is now one of the most economically run houses in the country.

A Meadow That Floats

Strip In Germany Rises When Rains Swell River

When spring rains swell the tiny river Hamme, near the small city of Osterholz, in Hanover, Germany, and it floods its banks, a strip of meadow on the south side, from two-thirds of a mile to a mile wide and three and one-half miles long, begins to rise, with all its trees, including even great oaks and birches. The whole meadow is afloat, and even in normal times one feels it give under the feet. Some 200 years ago the river is said to have loosened a small farm with house and barns and carried it for an hour downstream so gently that the sleeping family did not waken.

British motorists are now paying from 30 to 34 cents a gallon for petrol after a recent general reduction of two cents a gallon.

A man's best friends are his teeth, says a doctor. But, on occasions, even the best of friends fall out.

BLAMES FRANCE

The Archbishop of Canterbury

caused a mild sensation in the House of Lords when he declared France is largely to blame for the failure of Geneva disarmament negotiations. The Archbishop said he was convinced if disarmament fails, Germany will arm herself in accordance "with what she recognizes to be the continued suspicion of France."

Origin Of The Woolstock

Instituted In Victoria's Reign To Prevent Foreign Import

The Worshipful Company of Woolmen is petitioning the Court of Aldermen for an increase of livery. This City Guild is of ancient foundation, dating from the time when wool was the staple industry of England. The Lord Chancellor's woolstock itself was instituted in Queen Victoria's reign, when an Act was passed to prevent the importation of foreign wool. It was thought that the presence of wool there would be a reminder of the commodity that was the main source of our national wealth. The Church of St. Mary, Woolchurch, which had been destroyed in the great fire, owed its name to the fact that there is a beam in the churchyard for weighing wool. The Mansion House party stands on the church site.

An Interesting Report

U.S. Senator's Brains Heavier Than Those Of House Members

Senators' brains weigh more than those of members of the House of Representatives, according to a "legislative anthropology" report made to the American Association for the Advancement of Science. Dr. Arthur Macdonald, of Washington, said he had estimated the weight of the brain of eighty-nine of these lawmakers and had found that for seventy-one members of the House the average was fifty ounces, while for eighteen senators it was fifty-two ounces.

Wife: "The night before last you came home yesterday. Last night you came home to-day. If you come home tomorrow tonight, there'll be trouble!"

"Yes," said the enthusiastic motorist, "he'll do eighty-five."

"Per hour, per gallon, or perhaps?" inquired the wag.

"Yes," said the enthusiastic motorist, "he'll do eighty-five."

"Per hour, per gallon, or perhaps?" inquired the wag.

Trans-Canada Air Line

Will Be Inaugurated Some Time Next Year In Belief Held

A trans-Canada air service will be inaugurated "sometime next year," George M. Ross, Montreal, secretary of the Canadian Flying Clubs' Association, declared in an address to a Vancouver service club.

"The main object in Canadian aviation to-day is the establishment of a trans-Canada air line linking Vancouver with Halifax and Sydney," Ross said.

"A map of the necessary route across the Dominion has been completed and it is practically assured that the services will get under way some time next year."

He declared parliament realizes the necessity of such transportation and is lending every support to the movement.

"Two great continent hook-ups through aviation, are underway in which Canada is an important factor," Mr. Ross said. "One route is from Chicago, Edmonton, Nome and from there to the Orient. The other is planned to connect eastern Canada with Europe."

The Brainiest Animal

Well-Known Psychologist Thinks Chimpanzee Is Most Intelligent

Association with man evidently does not help an animal to increase its intelligence. In a controversy regarding the intelligence of the animal world, the claims of the cat, dog, and horse were summarily dismissed on the ground that they learn their feats and tricks by the trial and error method, much as a man learns to ride a bicycle without applying any brain power. Professor Cyril Burt, the well-known psychologist, championed the chimpanzee as his animal intellectual. Then an official of the "Brown Animal Institution" drew attention to the beaver's ingenuity. But neither of these animals according to a group of German psychologists possesses the mentality of the elephant. And what of the ant? It does seem as though scientists will have to set these candidates a series of intelligence tests.

Fat Stock Show Postponed

Saskatoon To Hold Annual Exhibition Early In August

Saskatoon's Fat Stock Show, announced for June, has been postponed until the annual exhibition early in August, according to manager S. W. Johns. It was found that the quota for export is now practically filled and that in all probability there would be quite a reduction in cattle prices during June. The next year's quota, however, starts on July 1, and although this means keeping the cattle another six weeks the exhibition authorities decided it would be a kindness to the exhibitors to delay the sale.

Likes Being Cave Man

Tourists on the Elchberg, near Gloggnitz, Lower Austria, came upon a wild-looking man in a cave. At first he fled from them, but eventually spoke to them and proved to be an educated man born in Vienna. Long unemployment had caused the man to live on berries and mushrooms, and says he has no wish to return to civilization.

Submarine Trip To Arctic

Sir Hubert Wilkins, arriving in England from New York, announced he would make a submarine exploration trip in 1935 to Spitzbergen and the Bering Straits. He will be accompanied by Lady Wilkins. Sir Hubert said 1,500 miles of the trip would be made under Arctic ice.

British Scientists Will Carry On Scientific Investigation In Canadian Arctic Archipelago

Cancer Research Bringing Results

Solution Of Problem Believed To Be In Sight

Solution of the cancer problem is in sight; the facts to reduce its death toll already known; the American Medical Association was informed at Cleveland.

A sort of Achilles heel of cancer has been found, a spot about the size of a quarter, appearing in many of the most serious types of this scourge. It has been and still is largely unrecognized. It leads to cancer and almost sure death, yet if treated in time there will be no cancer.

"There are enough known facts," said William Carpenter McCarty, M.D., of Rochester, Minn., "if they were properly and extensively applied, to solve the cancer problem."

"I have recently studied over 2,500 cancers the size of a quarter or smaller, found surgically in the breast, stomach and large intestine. None of these gave positive, characteristic signs or symptoms of cancer, but all gave the same and symptoms which are sometimes, although not always, associated with cancer."

"There were only two reasons why these relatively small cancers were discovered. They were suspected in spite of the absence of text book signs and symptoms, and they were found by exploration."

One very recent addition to the cancer "facts" was described by Max Cutler, M.D., director of the tumor clinic, Memorial Hospital, Chicago. That is the use of radium twice instead of once daily. Night radium treatments are given now and they catch and kill little cancer cells just beginning to grow.

May Seem Paradoxical

But Canada Needs More People Opinion Of Jackson Dadds

When Europe ceases to raise wheat uneconomically, men stop listening to "food faddists" and women decide to again develop the fashionable curves of years ago, then will Canada's wheat marketing problems be over, said Jackson Dadds, joint general manager of the Bank of Montreal and president of the Canadian Bankers' Association, in an address before the C.B.A. in London.

"It may seem paradoxical at such a time to say that Canada's greatest need is increased population," the banker said. "But it is a fact we need more people, for our physical equipment was designed for a much larger population which, at the time, was confidently expected within a few years."

The Great War, he said, upset these calculations and set European nations to making themselves self-sustaining, as far as possible, in respect to foodstuffs. It became difficult for Canada to sell her wheat—"and this at a time when it should be in demand, because actually in hard times wheat was usually in demand for the reason that it is the cheapest food, sustenance considered, known to civilization."

"In this enlightened day, and in spite of hard times, we are vast areas of land being used uneconomically to produce wheat by Europeans who could buy much better wheat from Canada at a lower cost," said Mr. Dadds.

Demand For B.C. Vegetables

Fraser Valley White Growers Find Market On Prairies

From comparatively small beginnings commercial vegetable production by white growers of the Fraser Valley has developed this year into a million dollar industry.

Large quantities of produce are not only supplied to Vancouver markets, but at least 70 carloads of vegetables will roll to the prairie provinces this season.

- SUMMER - CLEARANCE SALE!

7 Days Selling to Clean Up Our Summer Stock
Starts Saturday July 14, Ends July 21

Men's Department

Men's Dark Blue Bib Overalls

Double knee, high back style. Sizes 36, 38, 40 and 44. Special, pair \$1.15

Work Shirts, All Colors and Sizes
